

Protect Me From...

POLIOVIRUS (IPV)

I-LED

**Immunization Literacy and
Empowerment of Detroit**

TALK WITH YOUR DOCTOR

If you/your child:

- Had a severe allergic reaction after a previous dose or has any severe, life-threatening allergies
- Had a seizure or high fever after a previous dose
- Develop trouble breathing after a dose.

FAQ

What is polio?

- A contagious viral illness that can cause muscle weakness and paralysis

What does the vaccine do?

- It protects against polio and prevents paralysis and severe disease

Who should get it?

- Children, teens, and adults who are not fully vaccinated.

Is it safe?

- Yes. The inactivated polio vaccine is very safe and effective

Can the vaccine cause polio?

- No. The injectable polio vaccine cannot cause polio.

Why is it important?

Vaccination protects individuals and helps prevent the return of polio in the community.
